

ISOMETRIC AIR CONVEYOR

Introducing Ambec's Isometric Air Conveyors - the perfect solution for transporting a wide range of products in filling and can manufacturing in the Pet Food, Canned Foods & Vegetables, Seafood, and Beer & Beverage markets. With our innovative bi-directional airflow system, our patented air jet pattern allows the achievement of maximum container velocity with a simple adjustment of air pressure. Experience the perfect blend of high speed and precise control, without any risk of container damage.

Ambec Isometric Air Conveyor

DESIGN AND PERFORMANCE ADVANTAGES

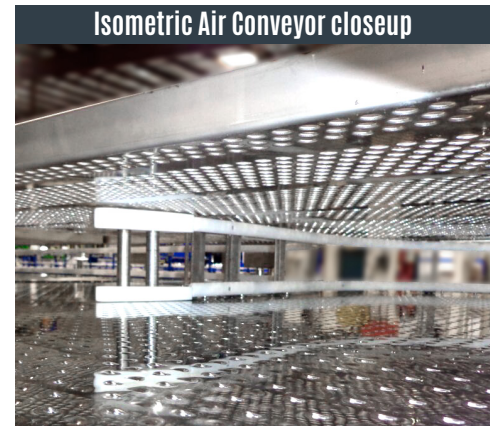

Enhance your product control with the addition of variable frequency drives as needed. Experience gentle product handling that minimizes scuffing on surface finishes. Enjoy precision control that guarantees zero dents upon impact. The Isometric Air Conveyor is the perfect solution for profiled cans.

FEATURES

- Choose from a variety of conveyor section types, including straight, auto switch, gates, auto merger gates, curves, and combiners
- Wide range of widths available, from 4 inches to 48 inches
- Easily adjust pressure in each zone manually or automatically, depending on your specific application
- Simplified control requirements mean fewer sensors needed
- Accommodates aluminum or steel cans in sizes ranging from 8 ounces to 24 ounces
- Durable powder-coated mild steel construction for long-lasting performance

AVAILABLE OPTIONS

- Stainless steel construction
