MAMBA LANER

Video

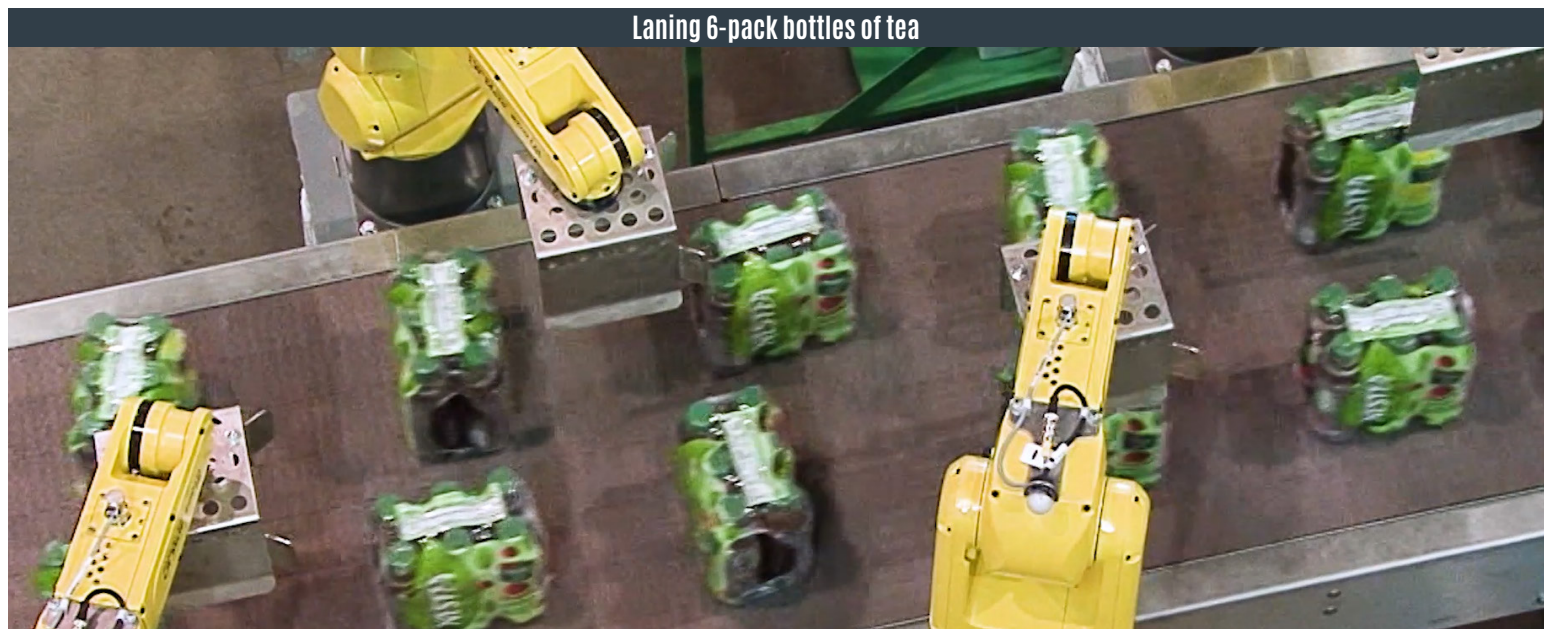

Introducing Ambec's revolutionary Mamba Laners, designed to flawlessly orient infedding products with uninterrupted precision and lightning-fast speeds. Say goodbye to the hassle of changing metering speeds or stopping the flow of your products. With our innovative design, changeovers are a breeze. The Mamba Laner effortlessly handles products of all sizes, ensuring a seamless and damage-free experience for your products.

FEATURES

- Four (4), small frame articulated arm robots
- Robot controls
- Sturdy support with four (4) robot stands
- Custom designed end-of-arm tooling for enhanced performance
- Case guide assembly for case turning
- Safety features
- Perimeter safety guarding with interlocked access door
- All electric/pneumatic operations
- Controls provided with conveyor

Note: Anything above 145 picks per minute will require a 4 robot cell. If lines speeds are slower fewer robots may be provided but will need confirmation from engineering.
