7000 SERIES RECIPROCATING PLACER

Video

Experience the ease of operation with our Reciprocating Placers, designed to effortlessly pick, denest, and place a wide range of products including blisters, clamshells, corrugated sheets, discs, and more. Whether you need a stand-alone machine or integration into your existing packaging system, our versatile reciprocating placer models have got you covered.

Choose from our range of reciprocating placers, including the compact 7206 (mini), the efficient 7200 (small format), the versatile 7320 (medium format), and the powerful 7300 (large format). Find the perfect fit for your needs and enhance your productivity today.

Nigrelli 7000 Series Reciprocating Placer

DESCRIPTION

The 7000 Series Reciprocating Placer is a versatile and reliable machine that comes equipped with several features to simplify your industrial processes. The machine features a pneumatically actuated air cylinder and heavy-duty construction, making it a durable option for any industrial setting. The 30-degree gravity-fed magazine (standard) and safety guard with an interlock switch are designed to ensure safe and efficient operation. Additionally, the Reciprocating Placer comes with swing-arm placement, making it easier to handle and operate. Overall, the 7000 Series Reciprocating Placer is a great investment for businesses looking to streamline their production processes and increase efficiency.
