Video

The Nigrelli brand of Ambassador Multipacker Cartoners are the ultimate solution for high-speed cartoning in the food and beverage industries. Designed to be both rugged and elegant, this state-of-the-art machine effortlessly handles 4, 6, 8, 10, 12, 15, 18, and 24-packs of cans, glass, or PET bottles, ensuring the reliability and efficiency your busy operation demands. With its innovative rotary carton set-up for single-wall and corrugate cartons, as well as its servo-driven technology and cycle stop flap closing, the Ambassador sets a new standard in performance and precision.

Nigrelli Ambassador (100/200) Multipacker Cartoner

DESCRIPTION

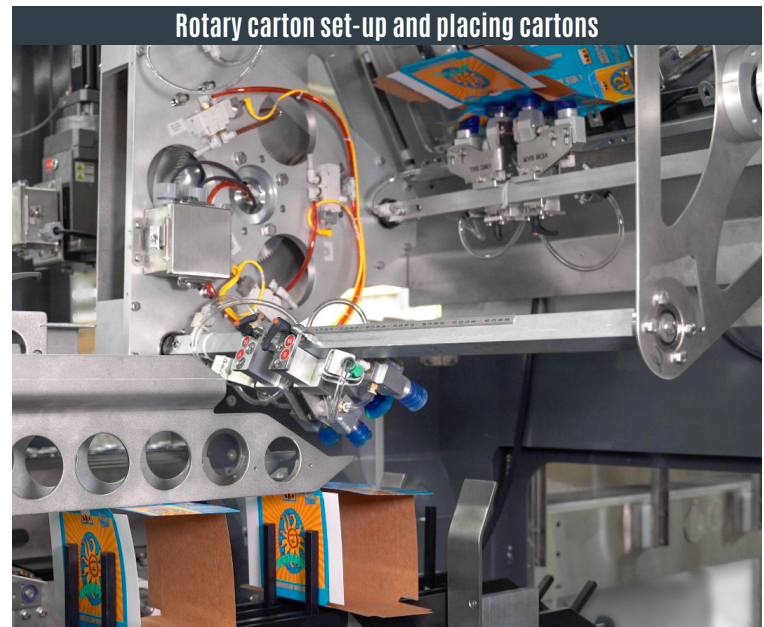

The Ambassador erects up to 150 cartons per minute with a touch that is gentle to both the carton and the product. Its unique servo and gear-driven rotary carton set-up reduces the number of moving parts and a 5' horizontal carton magazine makes carton loading easier than ever. That means less downtime and minimum maintenance, providing you with a more efficient operation.

The Ambassador features auto-prime and clear-out modes for easy start-up and finishing of product runs. It also features automatic flap closing during machine cycle stops, which minimizes the possibility of cartons with open flaps exiting the machine. The full-height, sliding guard door system allows for easy accessibility and is electronically interlocked for operator protection.

Let us show you how you can have both higher productivity and higher profits. BW Integrated Systems offers the highest level of support, from product handling solutions to defining Specifications to integration of your line.

FEATURES

- Fully automatic operation
