TRAY PACKING

ENVOY TRAY PACKER

Nigrelli's Envoy Tray Former Packers are advanced packaging systems that operate at high speeds, seamlessly integrating the loading of cans, cartons, and bottles onto corrugated trays, U-Boards, or pads. Powered by innovative servo technology, the Envoy ensures smooth and efficient operations. What sets it apart is its ability to accommodate even warped or damaged corrugate, thanks to its robust tubular frame and hassle-free changeover process.

DESCRIPTION

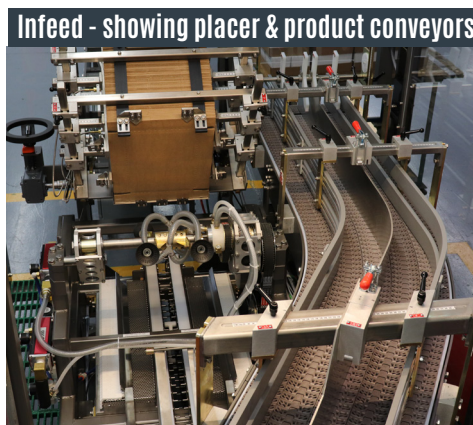

The Envoy is designed to meet the demands of round-the-clock production, with minimal maintenance requirements and exceptional performance at a cost-effective rate. Its high speed and adaptability make it perfect for accommodating various package configurations and container sizes. With simple tool-less changeover, you can maximize machine uptime while handling cartons, corrugate wraps, loose items, film-bundled packages, or even Hi-Cone packages.
