DESCRIPTION

With a tailored layout to fit your available floorspace and an end-of-arm tool meticulously designed to handle your specific products, our solutions offer different levels of automation. From simple floor-level palletizers to sophisticated systems featuring multiple robots and conveyors that seamlessly integrate with upstream and downstream equipment, we have the expertise to meet your unique requirements.

With decades of experience in material handling and a proven track record in robotics technology, our product offerings are known for their compact designs, enabling you to save precious floor space while efficiently handling multiple products in a single cell. By utilizing advanced electro-servo driven technology, our solutions require less maintenance and are built to outlast conventional equipment.

FEATURES

- Experience the convenience of a product infeed conveyor
- End-of-arm tooling that is designed for your specific product
- Effortlessly handle dunnage with our advanced system
- Top-notch Category-3 safety circuit
- Stay protected with perimeter guarding, light curtains, and interlocked personnel doors

AVAILABLE OPTIONS

- Freezer environment package
- Choice of robot manufacturer to fit your specific needs

Contact our experienced sales teams today for a comprehensive review of your application(s) and to see how our Robotic Palletizers can benefit your company.
