

TF 400V Tray-Matic Tray Former (*SWF Series*)

BW Integrated Systems' **SWF Series** TF 400V Tray Former constructs a one piece tray. Tray designs can be a very economical way to package your product. Design variations such as top flaps, diagonal corner, and display features can provide a unique and cost effective solution. Standard machine range dimensions are shown.

TF 400V Tray-Matic Tray Former (SWF Series)

The SWF line of bliss and tray formers dates back to the 1940's. With an install base of more than 5,000 machines worldwide, this versatile equipment can form hundreds of different styles of tray and bliss cases. Featuring a small footprint, these ruggedly built machines require little floor space and are easily moved on their casters or by fork lift to accommodate plant changes as necessary. With mechanical simplicity and durability as a primary focus, long life cycles are common among our installations.

Optional Features:

- High capacity hoppers fit various production needs
- Kwik-change features reduce changeover time
- Various glue systems - pressurized, mechanical, cold
- Large capacity glue systems to reduce filling intervals
- Automatic HSC lidding attachment inserts formed tray into HSC cover
- Servo-driven mandrel allows intermittent folding sequence

Contact our experienced sales teams today for a comprehensive review of your application(s) and to see how our TF 400V Tray-Matic Tray Former can benefit your company.
