

## SWF CS 430 Case Sealer

BW Integrated Systems' SWF CS 430 Case Sealer is a rugged, highly efficient and versatile case sealer. It can be configured and manufactured to seal with either tape or optional hot melt glue. Changeover is simple with hand cranks or levers so that no tools are required. Cases are transferred through the sealer with side belts to allow positive transfer and maintain square flap sealing.

# SWF CS 430 Case Sealer

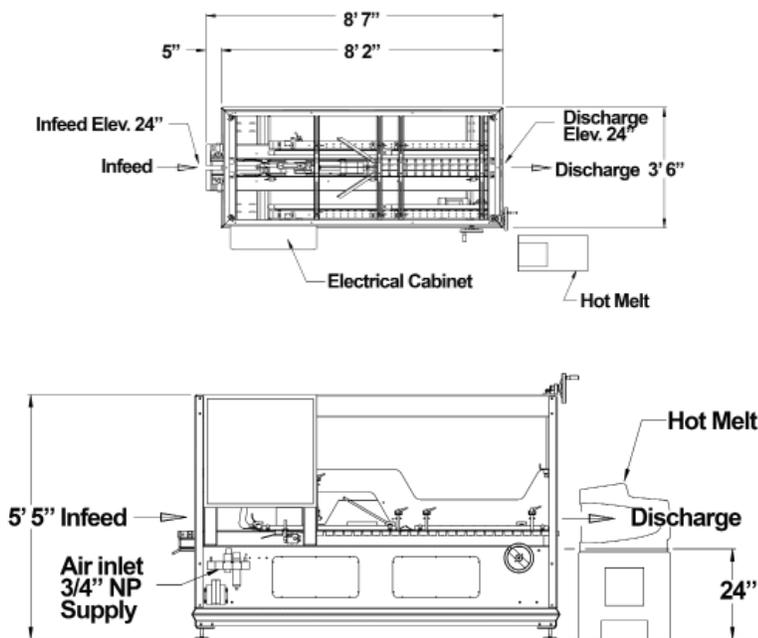

The automatic case indexing gate allows the CS 430 to be part of your system with no operator case handling needed. The standard machine can operate up to 30 cases per minute with an economical pneumatic flap tucker. An optional servo motor can be used for speeds above 30 per minute.

## Optional Features

- Corrosion resistant packages
- Servo Flap tucker
- Side flange case sealing
- Custom case size range

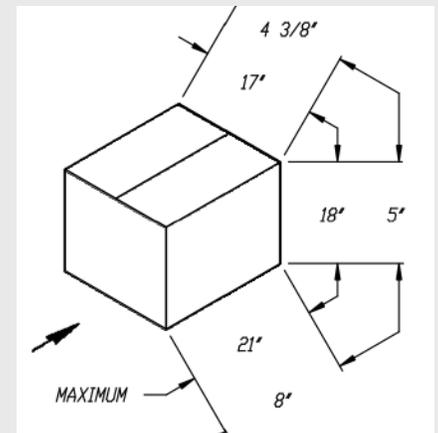

For more than 60 years, the SWF product line has been a leader in bliss, tray and case erecting solutions. We can help you and your corrugated supplier to determine the best packaging design and machinery solution for your application.

Contact our experienced sales teams today for a comprehensive review of your application(s) and to see how our Robotic Cylinder Palletizer can benefit your company.
