

Inserter Water Bottle

Overview

Upgrade your swing-arm inserter today! Streamfeeder's Inserter Water Bottle is designed to replace the stock water fountains on most inserters manufactured by Bell+Howell, Phillipsburg, and Mailcrafters. The Inserter Water Bottle accurately meters water to the envelope moistening brush, has higher capacity capabilities, is easier to clean & maintain, and has a positive water shutoff.

The Inserter Water Bottle is easy to install and requires no modifications to the inserter. Components are corrosion-resistant and shatter-proof. Available in 4vac and 24vac models to fit most applications.

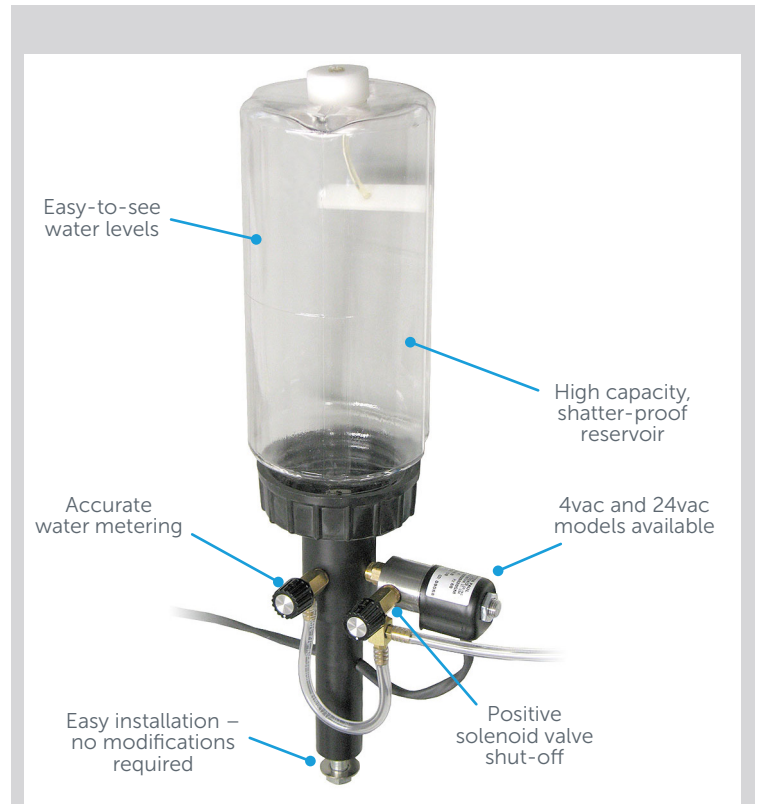

Features and Benefits

- Easy installation
- No modifications to the inserter
- Minimum maintenance
- Accurate water metering
- Easy to see water level
- Corrosion resistant
- Shatter proof
- Positive solenoid valve shut-off eliminates leaks when inserter is stopped
- High fill capacity

Applications

- Enveloper flap moistening on swing-arm inserters

Contact our experienced sales team today for a comprehensive review of your application/product and see how our Inserter Water Bottle can benefit your company.
