

FeedNet Communications System

Overview

Streamfeeder developed the FeedNet advanced collator communications system as a central control station for the collating system to provide communication integration between the conveyor, feeders, and host systems such as shrink wrappers, flow wrappers, poly-baggers, cartoners and more.

Features and Benefits

- Sequential Start/Stop
- Configurable Feeder Location
- System Diagnostics
- Host Interface
- Single Flight Sensor
- Line Synchronization
- Inter-pocket Adjustment
- HMI Touch Screen
- Timed-indexing
- Divert Signaling
- Job Size
- Down Stream Inhibit
- Audible Alarm
- Inter-pocket Adjustment
- Remote Access Support Module
- Other Optional Features Available

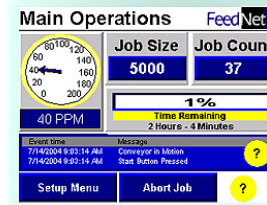

Applications

- Accumulating
- Batch Counting
- Collating
- Kit Fulfillment
- Package Inserting
- Tip-On/Affixing

Optional Features

- Ready-signal Indexing
- Selective feeding based on pre-programmed recipes or barcode designation

Contact our experienced sales team today for a comprehensive review of your application/product and see how our FeedNet can benefit your company.
